

Handout 24

Establishing a Schoolwide Vision

Do you have a schoolwide vision for data use? As you reflect, consider the following:

- Can you articulate the vision?
- What key concepts are incorporated in your vision?
Have you developed a common understanding of those concepts?
- How do you want to define what your students should know and how do you measure that?
- What key data points do you want to use?
- What does achievement mean to you? To your school community?
